

FLIPKART JEDI TRAINING 2.0

COURSE REGISTRATION SYSTEM

Framework

- DAY 1 -> Software installations and getting comfortable with the GUI of softwares like Java 17, STS and MySQL 8x with work bench.
- DAY 2 -> Deep dive into Git, Github and Java programming language.
- DAY 3 -> Learned the flow of the CRS app and made the basic structure and design.
- DAY 4 -> Reviewed the basic code, added more functionalities and learned more on Exception handling.
- DAY 5 -> Learned SQL and JDBC. Integrated our code to MySQL using JDBC.
- DAY 6 -> Deep dive into Dropwizard, Maven and REST API's.
- DAY 7 -> Learned and used Postman in our project.

Stakeholders

1. Sponsors

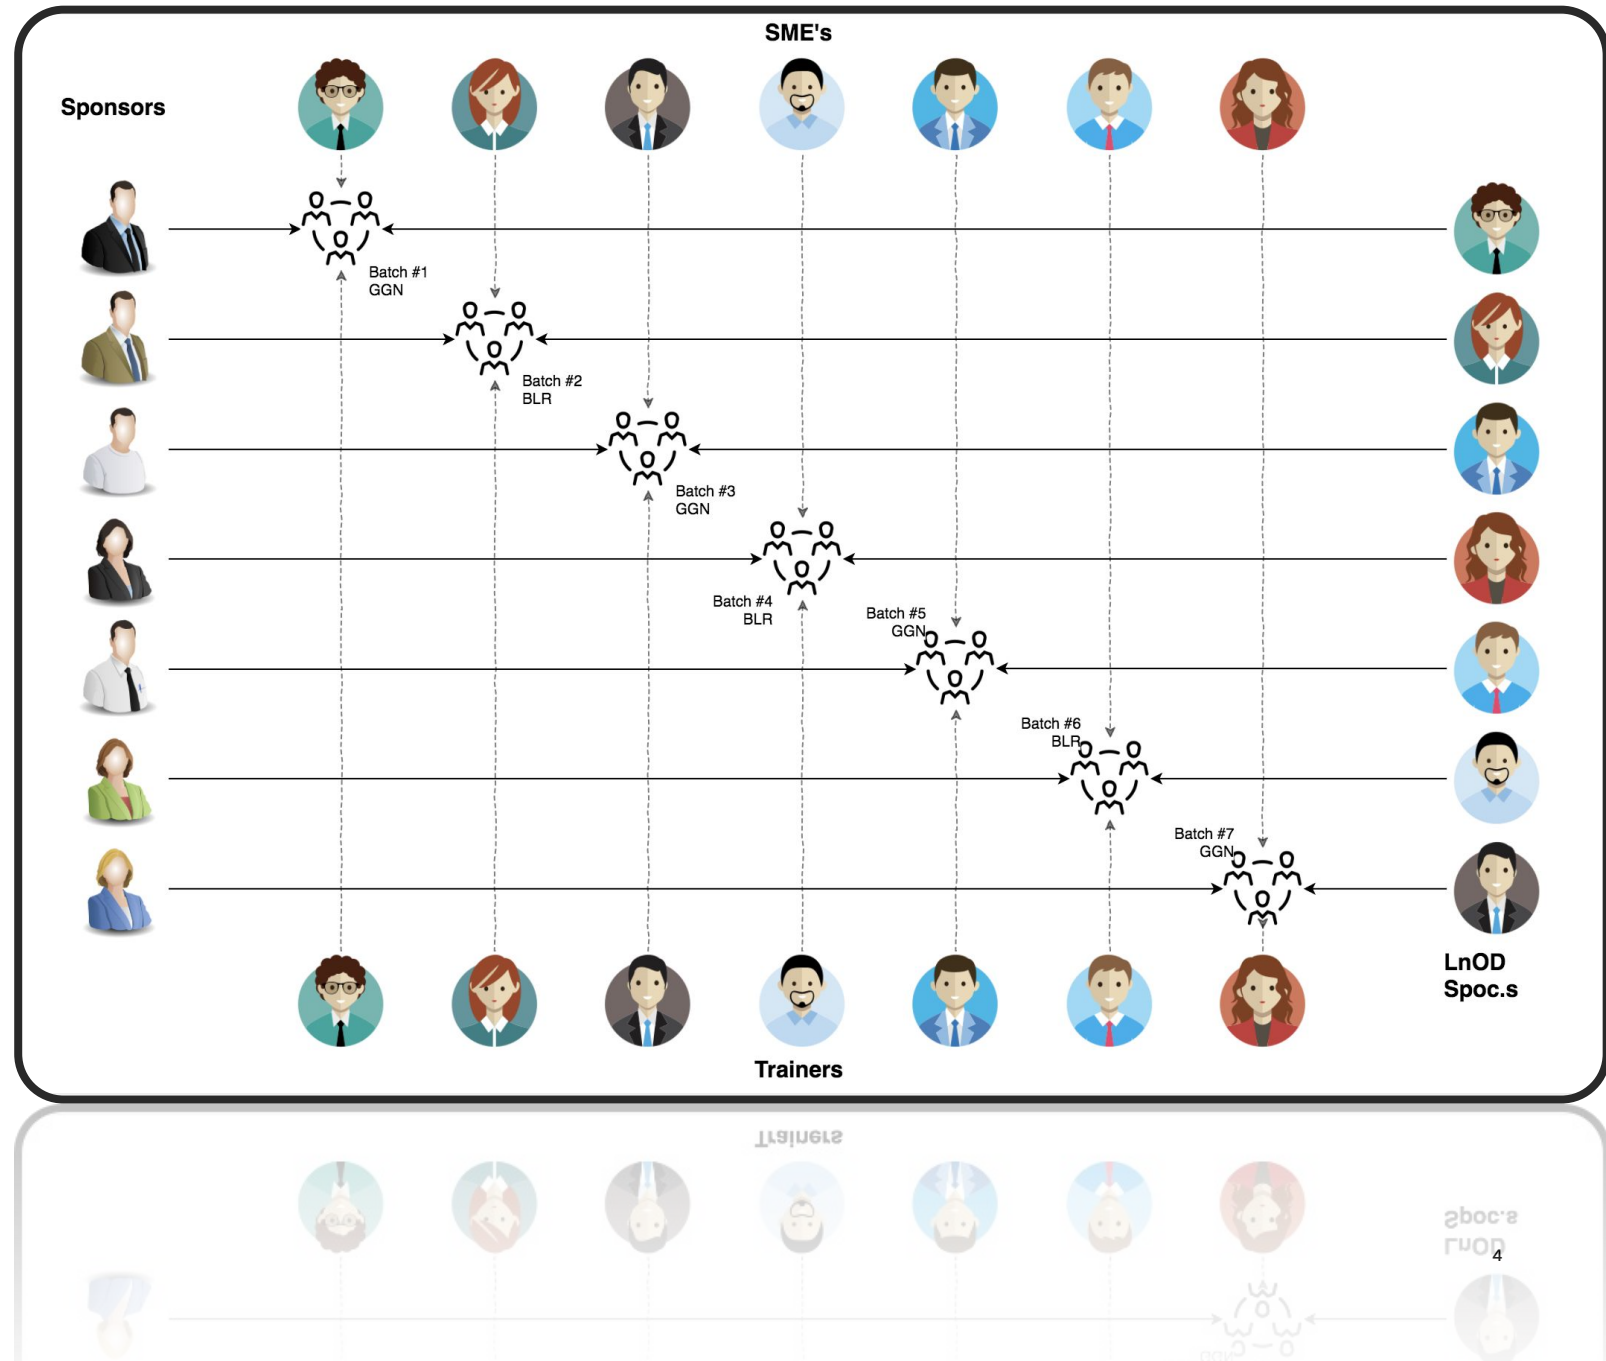

1. Flipkart

2. SME's

1. Amit

3. Coordinators

1. Anushka Khanna

A large white circle is centered on a solid red background. Inside the circle, the text "Our next starts NOW" is written in white.

Team Structure

Project Goals

Our Vision

Our Vision is to develop a modern and efficient **Student Registration System** that integrates seamlessly with the given course catalog. The system will enable students to register for courses, access report cards, and modify their schedules, while allowing professors to manage course offerings and record grades. It will ensure timely data access, secure student information, and support smooth registration and billing process.

Challenges & Learnings

- **Learned to effectively use Maven for managing dependencies and successfully integrated Dropwizard with MySQL for seamless data handling.**
- **Enhanced skills in Java development and gained hands-on experience in deploying RESTful services using Dropwizard.**
- **Improved teamwork and communication, effectively coordinating with team members to resolve issues and ensure project success.**
